

Connecting a Person to a Team with a Note

Persons in Teams can now be connected with Notes to be shown while onboarding in the correct team. To correctly connect a person with a note, the note has to be added to the corresponding month column when the person should be shown in the team. For example, if a person should be shown in the team in the month of June, the note has to be added to the June column. It is important to use the Notes instead of the comments in excel. The Notes can be added by right-clicking on the cell and selecting “Insert Note”.

The screenshot shows an Excel spreadsheet with columns for months from October to May. A right-click context menu is open over the June column, showing options like 'Ausschneiden', 'Kopieren', 'Einfügeoptionen', 'Zellen löschen', 'Inhalte löschen', 'Schnellanalyse', 'Filter', 'Sortieren', 'Daten aus Tabelle/Bereich abrufen...', 'Neuer Kommentar', 'Neue Notiz', and 'Zellen formatieren...'. The 'Neue Notiz' option is highlighted.

Figure 1: Insertion of a note in Excel

The screenshot shows the same Excel spreadsheet, but now a note is visible in the June column. The note text is: 'Kaasche, Marlon (SI EA R&D PR DE CPO): Onboarding'. The note is highlighted in yellow.

Figure 2: Use of the onboarding tag within the note

The screenshot shows the Siemens SIPROTEC Octopus web interface. The top navigation bar includes 'Tech Hubs', 'Core Domains', 'Products', 'Features', 'Subsystems', 'Components', 'Architects', and 'Teams'. The 'Teams' tab is selected. The main content area shows the 'AllStars' team page. It includes a team logo, a list of skills (Release Support, Azure DevOps, Test Infrastructure), and a 'Members' section. The 'Members' section lists four team members: Harms, Dirk (Role: Dev/Test), Klaue, Lars (Role: Team Architect), Schreiber, Arne Christian (Role: Dev/Test), and an undefined member (Role: Dev/Test). The undefined member is highlighted in red.

Figure 3: Person is shown in the team without any FTE value(here undefined because there is no Max Mustermann in the system)
